COVID-19 Update

Epimed's highest priority is the safety and health of our employees, customers, and business partners. We are closely monitoring the guidance of the World Health Organization and the Centers for Disease Control regarding the spread of the COVID-19 virus. Our focus is to ensure we meet customer needs while doing our part to keep our employees, our customers, and our communities safe.

Please note we do not anticipate the virus will impact business production. Epimed manufactures and distributes here in the United States, and our production is at full capacity.

We know that your business continues too, but you may have restrictions in-place limiting outside vendors. If you need products, please call your local sales representative or customer service at: 1-800-866-3342. We will ship your order so that you can continue to service your patients.

Here are the measures we are taking to keep everyone safe:

Regarding Travel

- All North American and European employees' business travel has been restricted
- Cancelled or postponed all travel to large in-person group meetings or conferences (20+ people)

Advising Production Personnel and Staff:

- Employees who are feeling ill or are care-giving for someone who is ill have been instructed to remain at home. They have received a formal letter and have been referred to the CDC website on what to do when you’re feeling sick
- Posted CDC Workplace Place Guidelines throughout the offices, kitchens, and public bathrooms
- Increasing frequency of cleanliness and sanitization procedures of surfaces and overall workplace

We are prepared to navigate these challenging circumstances with everyone’s safety in mind. If there is anything we can do for you please let us know.

Thank you from the entire Epimed family,

Gabor J. Racz
President & CEO
